- 96 Molecules Wall Lamp
- 320 Molecules Table Lamp
- 480 Molecules Floor Lamp

Designed by Ofir Zucker & Albi Serfaty,
in collaboration with origami artist
Ilan Garibi

Aqua Creations
Lighting & Furniture Atelier

It all begins with a blank sheet of paper, folded and sculpted by hand into a tessellation of molecules, based on the traditional Japanese art of Origami

A complement and contrast at the same time are the mahogany wood structures that derive their shape from digital CNC carving

The modular design of the wooden pieces allows them to be assembled into the different lamps of the collection

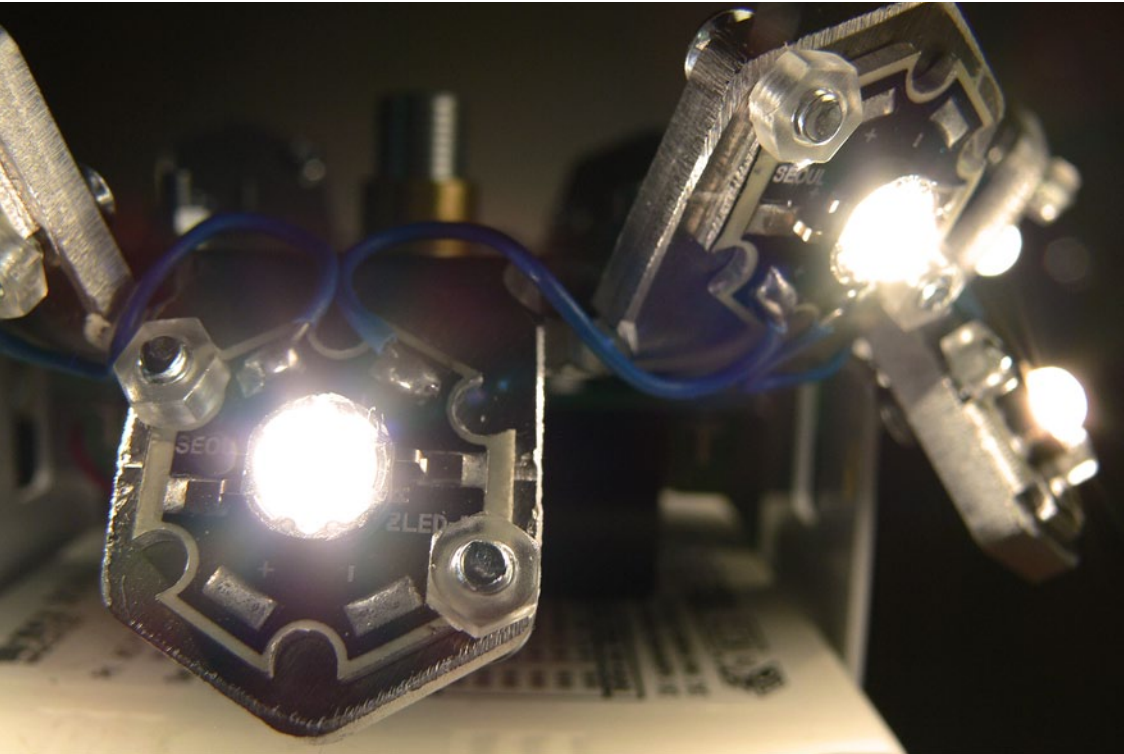

Paper and wood are merged together, fixing the shade into its shape and place

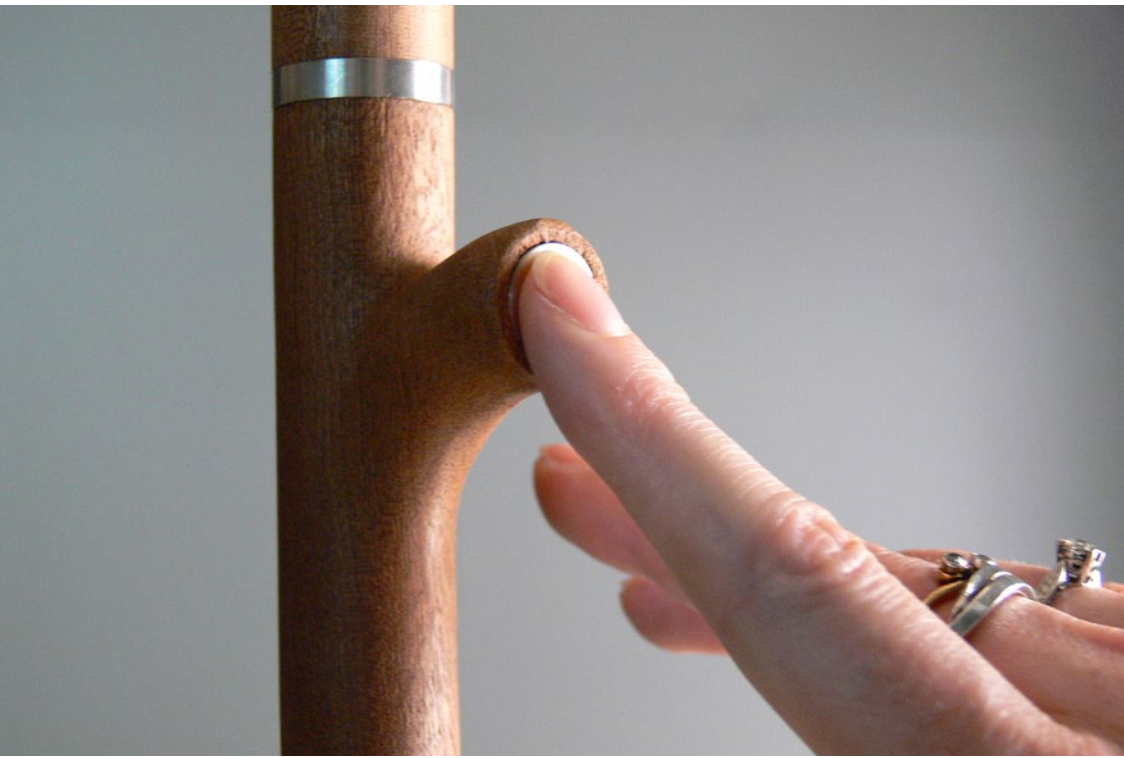

The attention given to each element forms the design

Lit by 12 energy saving LEDs, dimmed by digital DALI protocol

Operated by touch

And in Aqua's tradition...

It all comes together to form a comprehensive, luxurious and elegant lighting collection
